Philip Hayden, a primary school teacher, found a common weakness in some classrooms. They didn't have windows. And he felt it was affecting his students. "Most of the day, the kids are inside," Haydon said. "And they don't really get to see any trees, grass, or the blue sky."

The lack of windows does affect students' mental health, as research shows. It makes their concentration span (持续时间) shorter. But being in and around nature eases anxiety and has benefits for them. Students who have window view of trees do better academically, emotionally and creatively, and more of them graduate and go to college.

That’s why Hayden decided to bring nature into classrooms. At first, he planned to print pictures of trees onto curtains in the classrooms as a way to brighten them up. However, his colleagues reminded him that curtains would take up the wall space for maps and other teaching materials. So he thought, “Why not use the ceilings? Teachers don’t typically use the ceilings.”

Hayden took all the photos of trees himself. Then he got them printed onto the ceilings. “Overall, the class attendance has gone up because students are happier and want to come in more

frequently,” he said. “It has all those elements of the science that help calm kids down and help them focus and communicate.” A student called Dave said that the new addition did bring him peace. “It is surprising to see trees here. It is pretty great and beautiful. When I look up, it feels like I am sitting under a tree,” Dave said.

Hayden has launched a nonprofit program called Green Classrooms. The program has donated and installed “tree ceilings” in 10 school districts so far. “If you still don’t believe in the science behind the art, you can try it yourself by going outside and looking up at the trees,” said Hayden.

6. How does the lack of windows affect students?
 - A. It relieves their anxiety.
 - B. It boosts their creativity.
 - C. It shorten their attention span.
 - D. It regulates their behavior.
7. Hayden brought nature into classroom by _____.
 - A. planting trees in classrooms
 - B. installing green curtains on the walls
 - C. turning ceiling into windows
 - D. printing tree photos onto the ceiling
8. The change of the classrooms led to the students’ _____.
 - A. better sense of beauty
 - B. increased attendance
 - C. stronger passion for nature
 - D. shared interest in science
9. What is David’s attitude towards to the new addition?
 - A. Favorable.
 - B. Shocked.
 - C. Cautious.
 - D. Doubtful.
10. What is the main idea of the passage?
 - A. Teachers used ceilings to teach students.
 - B. Teachers decorated ceilings in classrooms.
 - C. Tree ceilings had advantages over curtains.
 - D. Tree ceilings helped students perform better.

C

Birds gained the ability to fly about 150 million years ago, which was a major event in animal history. For a long time, however, scientists haven’t fully understood how that happened. Recently, a team of researchers found birds started to fly due to changes in the part of the brain called cerebellum (小脑), which is responsible for muscle control and physical movement.

For the study, the scientists carried out brain scans of modern birds. With the scans, the team tracked the brain activity of modern birds to see whether it was different when the birds were at rest and right after they flew for 10 minutes. They scanned eight birds and looked at 26 parts of the brain. Only the cerebellum showed significant changes in activity levels before and after flying for all the birds.

These findings indicated that the ability to fly was connected to the cerebellum. To determine exactly how birds started to fly, the research team needed to figure out what the cerebellum looked

like in creatures that were alive around the time when birds began to fly. They studied a group of bird-like dinosaurs that had started to develop the brain conditions needed for flight.

The researchers couldn't look at the actual brains because those deteriorated long ago. But they could look at the dinosaurs' skulls (颅骨), which once held the brains. In the dinosaurs that were developing the ability to fly, the team found a significant increase in the size of the cerebellum. They also noted signs of increased brain complexity.

These findings have confirmed a connection between flying and changes to the cerebellum. Next, the team hopes to identify the exact areas within the cerebellum that helped the brain prepare for flight.

11. According to Paragraph 1, a major event in animal history was that _____.
 A. birds' movement was restricted B. birds developed the ability to fly
 C. birds' cerebellum became smaller D. birds strengthened their muscles
12. What is the second paragraph mainly about?
 A. The key process of the research. B. The application of the research.
 C. The background of the research. D. The basic principle of the research.
13. The researchers studied bird-like dinosaurs _____.
 A. to assess their flight distance B. to figure out how they developed wings
 C. to control their brain conditions D. to find what their cerebellums were like
14. What does the underlined word "deteriorated" in Paragraph 4 probably mean?
 A. Developed. B. Improved.
 C. Were damaged. D. Were enlarged.
15. In which section of a magazine does this passage most likely appear?
 A. Sports. B. Entertainment.
 C. Science. D. Health.

第二节 (共 5 小题, 每小题 2 分, 满分 10 分)

阅读下面短文, 从短文后的选项中选出可以填入空白处的最佳选项。每个选项只能选一次。

It is well established that eating vegetables is good for us. Why, then, do some people like them while others don't? 16 According to the research, people who eat vegetables and show an obvious unpleasant feeling for them can influence others.

A team of scientists set out to investigate how the facial expressions that people make as they eat affect a person watching them. They asked more than 200 college students to watch videos of other people eating raw broccoli (花椰菜). 17 They would smile, seem neither happy nor sad or look annoyed or upset by what they were eating.

The study found that when participants watched someone else eating broccoli with a strong dislike, they began to like broccoli less. 18 When someone had a positive facial expression while eating broccoli, people watching them did not end up liking broccoli more.

19 This means that if children see their parents or brothers and sisters not enjoying

certain food, including vegetables, they might not want to eat them either.

The team hopes to understand more about how the behavior of adults influences children's enjoyment of food. 20

- A. However, the opposite was not true.
- B. Experts think the research result could also apply to children.
- C. The people in the videos had different expressions while eating.
- D. A new study has found that other people's likes and dislikes could play a part.
- E. This could help experts find ways to encourage young people to eat more healthy foods.

10. 【精析】D 主旨题。本文主要讲了一名老师通过在教室的天花板画树帮助学生提高专注力和兴趣的故事，D 选项意为“树形天花板帮助学生表现得更好”，符合。

【全文翻译】

小学教师菲利普·海登发现一些教室存在一个共同的缺点。它们没有窗户。他觉得这影响了他的学生。“孩子们大多数时间都在教室里。”海登说。“他们真的看不到树木、草地或蓝天。”

研究表明，窗户的缺乏确实会影响学生的心理健康，让他们的注意力持续时间变短。但置身于大自然之中或周围会缓解焦虑，对学生有益。那些能从窗户看到树木的学生在学业、情感和创造力方面都表现得更好，而且他们中有更多的人能够毕业并进入大学。

因此，海登决定把大自然引入教室。起初，他计划把树木的图片打印在教室的窗帘上，以此来使它们更明亮。然而，他的同事提醒他，窗帘会占用墙上挂地图和其他教学材料的地方。于是他想，“为什么不用天花板呢？老师通常不用天花板。”

海登亲自拍摄了所有树木的照片。然后他把它们打印到天花板上。“总的来说，学生的出勤率提高了，因为他们更快乐，也更愿意经常来上课，”他说。“它包含了所有能让孩子平静下来、帮助他们集中注意力并与人交流的科学元素。”一个名叫戴夫的学生说，这个新添的装饰确实给他带来了平静。“在这里看到树木真是令人惊讶。它非常棒，非常美丽。当我抬头看时，感觉就像坐在树下一样，”戴夫说。

海登发起了一项名为“绿色教室”的非营利性计划。到目前为止，该项目已在 10 个学区捐赠并安装了“树木天花板”。“如果你仍然不相信艺术背后的科学，你可以亲自到户外，抬头看看树木，”海登说。

C

11.【精析】B 细节题。由第一段第一句 Birds gained the ability to fly about 150 million years ago, which was a major event in animal history. “鸟类大约在 1.5 亿年前获得了飞行的能力，这是动物史上的重大事件。”可知选 B。

12.【精析】A 主旨题。第二段主要讲了科学家是如何开展研究的，scan “扫描”、track “追踪”，选项 A 表示“研究的关键过程”，符合。

13.【精析】D 细节题。根据题目关键词 bird-like dinosaurs “鸟类恐龙”定位到第三段，由该段第二句 To determine exactly how birds started to fly, the research team needed to figure out what the cerebellum looked like... “为了准确确定鸟类是如何开始飞行的，研究团队需要弄清楚小脑长什么样”可知选 D。

14.【精析】C 猜词题。第四段第一句 The researchers couldn't look at the actual brains because those deteriorated long ago. 表示“研究人员无法观察实际的大脑，10 年插本公号 · Tim 插本英语，因为那些大脑很久以前就 deteriorated 了。”，此处的大脑“brains”指上文提到的鸟类恐龙的大脑，但恐龙早已灭绝，它们的大脑固然也早已不复存在，故选项 C “被损坏的”符合。

15.【精析】C 来源题。文章主要讲了科学家如何开展对鸟类飞行能力的研究，由此可知文章很可能来源于杂志的 science “科学”部分。其它选项意思分别为 sport “体育”、entertainment “娱乐”、health “健康”。

【全文翻译】

鸟类大约在 1.5 亿年前获得了飞行的能力，这是动物史上的一个重要事件。然而，长期以来，科学家们一直未能完全理解这一能力是如何出现的。最近，一组研究人员发现，鸟类之所以开始飞行，是因为大脑中称为小脑的那部分发生了变化，小脑负责肌肉控制和身体运动。

为了进行研究，科学家们对现代鸟类的大脑进行了扫描。通过扫描，研究小组追踪了现代鸟类的大脑活动，以观察它们在休息时和刚飞行 10 分钟后的大脑活动是否有所不同。他们对 8 只鸟类进行了扫描，并观察了大脑的 26 个部分。在所有鸟类中，只有小脑在飞行前后的活动水平发生了显著变化。

这些发现表明，飞行能力与小脑有关。为了准确确定鸟类是如何开始飞行的，研究小组需要弄清楚在鸟类开始飞行时，这些活物的小脑是什么样的。为此他们研究了一组已经开始发展飞行所需大脑条件的鸟类恐龙。

研究人员无法观察实际的大脑，因为这些大脑很久以前就已经退化了。但他们可以观察恐龙的头骨，这些头骨曾经容纳过大脑。在正在发展飞行能力的恐龙中，研究小组发现小脑的大小显著增加。他们还注意到大脑复杂性的增加迹象。

这些发现证实了飞行与小脑变化之间的联系。接下来，研究小组希望确定小脑内帮助大脑为飞行做好准备的确切区域。

二、五选五（2 分/题，共 10 分，10 年插本公号 · Tim 插本英语）

16.【精析】D 空格后 according to the research “研究表明”与 D 选项 A new study has found that “一项新研究发现”匹配。

17.【精析】C 选项 C 讲人们吃东西时表情各异，与空格后展现各种表情相匹配。

18.【精析】A 空格前说进食者厌恶的表情会导致观看者也没食欲，空格后却说进食者积极的进食表情并不会让观看者食欲增加，选项 A “然而，相反的情况却不成立”能把前后文连接起来。

19.【精析】B 选项 B “专家认为研究结果同样适用于孩子”，空格后讲的是孩子们面对非积极进食表情时也表现得没有食欲，正好对应前面的研究结果。

20.【精析】E 空格前讲专家们希望更好地了解成人的行为对孩子食欲的影响，选项 E 讲这能帮助专家找到鼓励年轻人多吃健康食品的方法，两者相匹配。

【全文翻译】

众所周知，吃蔬菜对我们有益。那么，为什么有些人喜欢吃蔬菜而有些人不喜欢呢？一项新研究发现，其他人的喜好也可能起到一定作用。研究表明，吃蔬菜且表现出明显不快情绪的人可以影响他人。

一组科学家开始研究人们进食时的面部表情如何影响观看者。他们让 200 多名大学生观看其他人吃生花椰菜的视频。视频中的人在进食时表现出不同的表情。他们有的面带微笑，有的看起来既不快乐也不悲伤，有的则因为所吃的东西而显得恼火或沮丧。

研究发现，当参与者看到其他人非常不喜欢吃花椰菜时，他们自己对花椰菜的喜爱程度也会降低。然而，相反的情况却不成立。当有人吃花椰菜时露出积极的表情，观看的人并不会因此更加喜欢花椰菜。

专家认为，这一研究结果也可能适用于儿童。这意味着，如果儿童看到父母或兄弟姐妹不喜欢吃某些食物（包括蔬菜），他们可能也会不想吃这些食物。

研究团队希望进一步了解成人的行为如何影响儿童对食物的喜好。这有助于专家找到鼓励年轻人多吃健康食物的方法。

三、完形填空（2 分/题，共 30 分）

21.【精析】D 考查形容词辨析。guilty “内疚的；有罪的”，confident “自信的”，ashamed “惭愧的”，proud “自豪的”。结合语境可知她对自己游历了 193 个国家一事感到自豪。

四、语法填空（1.5 分/题，共 15 分）

36.【精析】named 考查非谓语动词。name 作动词意为“命名”，后面 Greenburg felt...是主语和谓语，所以动词 name 要充当非谓语动词，其逻辑主语是 country，和 name 之间是被动关系，故用过去分词表被动。

37.【精析】deeply 考查副词。本题 was connected to 是谓语，意为“与……有联系”，提示词 deep 是形容词“深的”，要转换成副词去修饰动词词组，故答案为 deeply。

38.【精析】saw 考查谓语动词的时态。本题 he 是主语，缺乏谓语，所以提示词 see 要充当谓语动词。联系上下文，运用了一般过去时描述过去的事情，故本题也用一般过去时，答案为 saw。

39.【精析】an 考查冠词。空格后有“形容词+可数名词单数”的结构 annual charity event，且是本文第一次提及，故填不定冠词。又因 annual 以元音发音开头，故填不定冠词 an。

40.【精析】which 考查非限定性定语从句。空格前有名词 goal “目标”，且有逗号，可知考查非限制性定语从句。空格后有谓语 was，可知该处要作主语，指代物，故填引导词 which。

41.【精析】to use 考查非谓语动词。空格前已经出现谓语 was，提示词 use 为动词“使用”，只能充当非谓语动词。又因为固定搭配 be determined to do sth. “决心要做某事”，故填答案 to use。

42.【精析】in 考查介词固定搭配。固定搭配 succeed in doing sth.，意为“成功做某事”，故填介词 in。

43.【精析】members 考查名词复数。空格给出提示词 member，是名词“成员”，联系语境，成员不止一个，故填名词复数 members。

44.【精析】tired 考查形容词。feel+形容词，表示“感到……”，故填 tired “疲倦的”；此外，tiring 表示“令人疲倦的”。

45.【精析】myself 考查代词。本空在动词 remind 后作宾语，主语是 I，应用反身代词，故填 myself。

在十岁生日那天，格林伯格醒来时听到他出生的城市发生了严重地震的消息。格林伯格生活在另一个国家，但他的名字是以他的出生城市命名的，他觉得自己与这场灾难有着深刻的联系。在一种强烈的助人愿望的驱使下，他看到了一个通过他对跑步的热爱来改变世界的机会。两年前，格林伯格第一次跑了半程马拉松，为一年一度的儿童慈善活动筹集资金。

这次他定了一个新目标，跑 10 公里，跑 10 次，每跑一次，代表他生命中的一年。他决心利用这次挑战为抗震救灾筹集资金。在四个月的时间里，他总共跑了 100 公里，比两次马

拉松还多。在他最后一次跑步中，当地慈善中心成功组织了一次社区活动。格林伯格的父亲、老师和当地社区的成员也加入了进来。

最终，格林伯格的项目为地震灾民筹集了 10 多万美元。“有时候我觉得很累，”格林伯格在最后一次跑步后告诉当地新闻记者。“但随后我会想起所有我正在帮助的人，我会继续努力。”
